INTERSHIPS

WORK APPLICATION (India) PVT LTD/CHENNAI-INTERN (ONSITE-1 Month)	Dec - 2025
• Completed structured training in full stack web development, focusing on React.js, JavaScript, HTML5, CSS3, and basic backend concepts. • Built practice-based frontend modules and React components as part of guided assignments and learning exercises. • Gained exposure to development workflows, Git/GitHub usage, and basic debugging practices.	
FRONT END DEVELOPER INTERN– CODEVINEZ/VELLORE-INTERN (REMOTE 1 Month)	Jun 2025-Jul 2025
• Completed hands-on training in React.js, focusing on component-based architecture and reusable UI development. • Gained practical experience in state management, props handling, and minimizing unnecessary re-renders. • Implemented form validation and structured error handling as part of UI development practice. • Worked on building responsive user interfaces using modern frontend development practices.	

PROJECTS

AI MOCK INTERVIEW (JAVA, Spring boot, SQL,React) • Developed an AI-based mock interview platform to simulate technical and HR interviews. • Implemented Spring Boot APIs to manage interview sessions,questions,and user responses with interactive React interface. • Integrated AI to dynamically generate interview questions and evaluate user answers with personalized feedback using NLP models.	
LIBRARY MANAGEMENT SYSTEM (Java, Spring Boot, SQL, React) • Developed a Library Management System using Spring Boot, React, and MySQL. • Implemented book management, borrowing/returns, and user authentication using JWT. • Integrated online payments for finances and subscriptions using Razorpay.	
FOOD ORDERING AND DELIVERING SYSTEM (Java, Spring boot, SQL, React) • Built a web-based food ordering system allowing users to browse menus,place orders,and track deliveries. • Developed backend services using Spring Boot for order,cart,and user management. • Created responsive React components integrated with SQL-backed REST APIs.	
ONLINE RETAIL RECOMMENDATION SYSTEM (Python) • Developed an Online Retail Recommendation System using Python on historical transaction data from Kaggle. • Preprocessed and transformed retail data to analyze customer purchasing patterns. • Generated data-driven product recommendations to improve customer engagement and sales potential.
